PROFILE

Passionate Front-End Developer with a creative flair and a strong foundation in web development. I thrive on turning design concepts into seamless, responsive, and user-friendly digital experiences. My goal is to contribute my skills and expertise to projects that challenge me and allow me to make a meaningful impact on the user experience.

PROFESSIONAL WORK EXPERIENCE

SOFTWARE DEVELOPER

MONTBLEU TECHNOLOGIES PVT. LTD

Product-Based and Service-Based Software company

SEP 2022 - PRESENT

- Currently Working with Que Glider, an India-based application facilitating user appointments with doctors. Responsible for managing user accounts, I collaborate with doctors to input their availability details and allocate specific times for user consultations to address their queries effectively.
- Designed, developed, and maintained Motiv AI web app with VueJS, enabling real-time tracking of Driving Score, Skill, Anticipation, and Self-confidence. Implemented visual graphs for Risk Alerts and Performance Comparison, utilizing geolocation features and dynamic Google Maps and HERE Maps integration. Crafted a responsive dashboard, showcasing proficiency in VueJS and front-end development. Contributed to innovative solutions for driver monitoring and safety, employing a data-driven approach.
- Migrated MotivAI web application, VueJS to ReactJS.
- Developed and enhanced the myHire Cloud web app for a US client, utilizing ReactJS for a responsive UI. Integrated booking functionalities for caregivers, enabling users to browse and select based on detailed profiles. Merged technical expertise in ReactJS with a focus on responsive design, ensuring a feature-rich, user-centric experience for clients and caregivers.
- Developed Vayuh.ai(blog website) for US based client using NextJS.
- Design and developed Motiv AI static web site.
